

Rowledge Cricket Club Environmental Policy

Our commitment

Rowledge Cricket Club is committed to minimising any adverse impact on the environment from its activities and will in particular:

- Comply with all applicable environmental legislation and other specific requirements to which Waverley Borough Council subscribes
- Prevent as much as possible pollution of land, air and water from the Club's premises and its activities
- To operate with a view to ensuring all possible re-cyclable goods or waste is sent to the correct management waste disposal sites
- Minimise energy consumption by improving energy efficiency in line with governmental requirements and implementing, wherever possible
- Promote waste minimisation, re-use and recycling of waste to ensure safe disposal (i.e. cardboard, bottles from bar sales)
- Encourage suppliers of works and services to adopt best environmental practices and buy or use goods from sustainable sources wherever possible
- Demonstrate our responsibility as a good neighbour by actively supporting environmental initiatives in the local community
- Promote a culture of environmental awareness across the Cricket Club as a whole

Our contribution

- We will promote re-cyclable waste management
- We will try to enhance the appearance of our Recreation Ground, which is under our responsibility, in whatever way is agreed by the local community
- We will reduce our energy use by ensuring all our members are aware of the policy and switch off all power not required in the pavilions after use
- We will continually look for ways to reduce electricity use and water consumption during the cricket seasons
